Notes: Cell values are scores on scales; all 0–100.

<sup>a</sup>Statistical significance levels: \* = .05, \*\* = .01, \*\*\* = .001, NS = not significantly different. Substantive significance (difference across means of 5 scale points out of 100) indicated by cells shaded in gray. We exclude the “other” category from calculating substantive significance.

<sup>b</sup>From 2012 surveys; data only from Bolivia, Colombia, Dominican Republic, Costa Rica, Uruguay, Mexico, Honduras, Argentina, Brazil, Paraguay, Nicaragua, Chile, and Venezuela.

<sup>c</sup>From 2012 surveys; all 18 countries included.

<sup>d</sup>Number varies slightly by variable due to differing numbers of missing cases; normal sample = 1,500 per country for all items unless otherwise indicated.
