

Assignment Visibility

When looking for an assignment in the Content Repository, the assignment will present itself as **visible** (👁) or **not visible/hidden** (👁).

From the Content Repository:

1. Click **Assignments** to expand the Assignment Panel.
2. Then, click the name of the assignment.
3. This expands another panel on the right, showing that particular assignment's details. (In this example, *Assignment 1* was chosen).
4. You can access the visibility option by clicking **Hide**.

5. Now, the assignment should have a hidden icon next to it (👁). **Note:** Assignments that are hidden are not seen by students on their Class Homepage.
6. To show the assignment again, return to the assignment details. (In this example, *Assignment 1* was chosen).
7. Click **Show**. For more details, see image below.
