

The screenshot shows a window titled "HRTEMP2.tmp" with a standard Windows-style title bar. Below the title bar is a toolbar with a "Page" label, navigation arrows, "6 of 7", a "Font Settings..." button, and a help icon. The main content area displays a list of code references and their source material.

Case	Code	Frequency	Type	Reference	Source
MACKEY	more involved with data	1	TEXT	12279,12836	mackey.txt

Source Material:

D: Also, all of our interviews are tape-recorded, and we keep the tape, so that if we want to check back uh on the original interviews we can do that, and they become the property of the project. Um and doing that, and then being able to, to code the transcribed interview -- I hadn't thought of it until now, but it seems to me like it's really freed us up to do the kind of things that it's important to do with this type of research, and that is to get involved with the data and think about what it means. You know, it's a great resource in that respect
