

Figure 11.7

An SPSS Screenshot of Post Hoc Tests With Homogeneous Subsets

Depression_Score**Tukey HSDa**

Treatment	N	Subset for alpha = 0.05	
		1	2
1 = CBT	6	8.0000	15.5000 16.3333
2 = PDT	6		
3 = NT	6		
Sig.		1.000	.946

Homogeneous Subsets:

This table displays the same information as the previous table in a less precise but more readable way; this table groups means that are not significantly different into the same column; conversely, means that are statistically different are placed in different columns.

Means for groups in homogeneous subsets are displayed.

a. Uses Harmonic Mean Sample Size = 6.000.
