

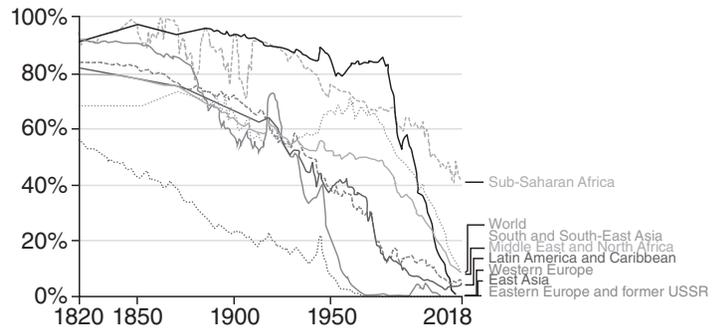

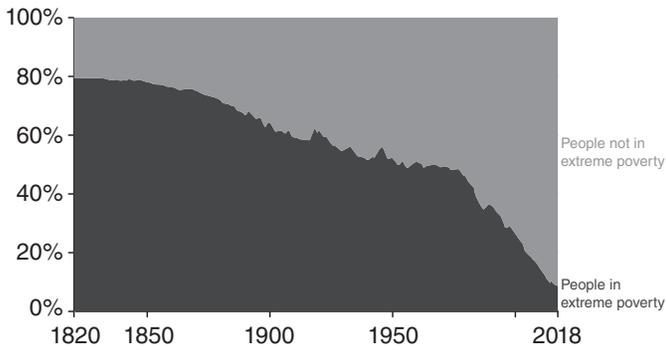

**FIGURE 6.3 ■ Extreme Poverty Over Time**

**(a) Percentage of World Population Living in Extreme Poverty**      **(b) Percentage of Population Living in Extreme Poverty**

*Note:* The figure is from the Our World in Data project (Hasell et al. 2022), <https://OurWorldInData.org/poverty>. Extreme poverty is defined as living below the International Poverty Line of \$1.90 per day. Data, which come from Moatsos (2021), are measured in international dollars at 2011 prices to account for inflation and differences in the cost of living.
