

TABLE 7.1 ■ Pro-Democracy Protest: Do I Participate or Not?			
	Scenario 1	Scenario 2	Scenario 3
	Fewer than $K - 1$ participate	Exactly $K - 1$ participate	$K$ or more participate
Participate	Pay cost; don't receive benefit	Pay cost; receive benefit	Pay cost; receive benefit
Don't participate	Don't pay cost; don't receive benefit	Don't pay cost; don't receive benefit	Don't pay cost; receive benefit

*Note:*  $K$  = the number of individuals that must participate for the pro-democracy protest to be successful. Each cell indicates what will happen in each of the three possible scenarios depending on whether the individual chooses to participate in the protest or not. The shaded cells indicate the individual's best choice in each of the three scenarios. It's assumed that the value of the benefit received by the individual when the protest is successful outweighs their cost of participating in the protest.
